Sharda University awaits first students

The leadership of the Indian university, which opened a representative office in the CIS for the first time, spoke about the prospects of the new educational institution.

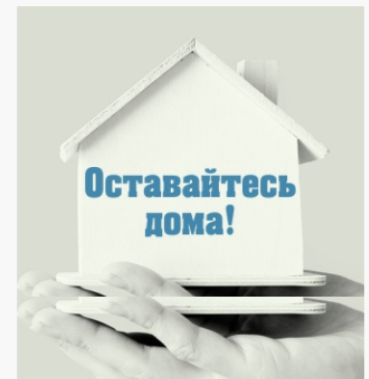

It was organized in accordance with the decree of the head of state "On the establishment of Sharda University in Uzbekistan" dated April 10, 2019 and the Plan of practical measures for the implementation of bilateral documents signed during the President's state visit to the Republic of India on September 30 - October 1, 2018. This is part of the policy of the country's leadership to expand long-term relations with leading foreign higher educational institutions, contributing to the training of qualified personnel in accordance with generally recognized international requirements and standards. Among the areas of study provided for by the decree are information technology and cybersecurity, maintenance of computer systems, electronics, electrical and communication engineering, business management and other demanded specialties.

Символично, что филиалы иностранных вузов теперь появляются не только в Ташкенте, но и Самарканде, Фергане, Алмалыке. А Университет Шарда создан в Андижане. Его учредитель - один из крупнейших в Индии частных образовательных трастов "Sharda Educational Trust", действующий в сфере с 1996 года и сотрудничающий с партнерами по всей планете. Он объединяет ныне учебные кампусы в Агре, Матхуре и Большой Нойде. In the last city - near Delhi - the Sharda University has been located since 2009. More than 20 thousand students from almost 80 countries of the world receive knowledge there from more than 1200 teachers in two hundred bachelor's, master's and doctoral programs in various fields - from social sciences and architecture to medicine and art.

"Our plans already included opening a branch in the Commonwealth of Independent States, therefore we gladly accepted the proposal to create a university in Uzbekistan, announced during the last year's visit of President Shavkat Mirziyoyev to India," said Amal Kumar, head of the Sharda University administration. - The Andijan University will start training personnel for three areas already in the fall: ICT, engineering and business. This year, it is planned to accept 400 students. Primary exam - IELTS - for knowledge of English. Those who scored more than five points have a chance to study on a grant basis. The rest are also tested in physics, mathematics, chemistry.

Прием абитуриентов и аттестация выпускников организуются в порядке, определяемом зарубежной стороной. Заниматься ребята станут на английском, узбекском и русском языках по планам и программам, разработанным на основе стандартов индийского вуза с учетом

отечественных требований. Наиболее перспективных направят на обучение и стажировку в эллага, other large foreign specialized educational institutions and research centers. They will receive a diploma that is recognized in both countries.

The trust took over the construction and equipment of the campus in our country at the expense of its own and borrowed funds. Until April 1, 2022, the university is exempt from all types of taxes, as well as a unified social payment in terms of the wage fund for foreign workers, its founder - from corporate income tax on income received from the activities of the university in Uzbekistan, and imported equipment - from customs payments other than clearance fees.

- The classes will be conducted by prominent specialists from India, Great Britain and the USA, as well as Uzbek teachers. The academic year is the same as in the republic - two semesters from September to June, - continued Amal Kumar. - So far, only undergraduate courses are open, but in the near future there will be a magistracy. The head university has a well-organized training of personnel in the medical profile, it has its own hospital. There are plans to create a similar structure here as well.

The name obliges a lot, because Sharda is one of the names of the goddess of knowledge, learning, music, arts and wisdom Saraswati. Its habitat is the lotus, which can also be seen on the emblem of the university. The variegation of colors represents a multitude of courses and representatives of different peoples and beliefs working together.

The university will apply the latest achievements of science and technology, modern pedagogical and information and communication technologies, engage in research in ICT, technical, exact and medical disciplines. Specialists will have the opportunity to improve their qualifications and take retraining courses both here and in major foreign institutions.

Alexey Romanov.
